PRIMARY EXAMINER

The following is an Examiner's Statement of Reasons for Allowance. The prior art of record fails to anticipate or render obvious the claimed combination of a fully end to end IP enabled wireless mobile network including a plurality of base stations coupled together via a backbone, each of the base stations having an associated coverage area and communicating with a plurality of mobile hosts located within the associated coverage area; each of the mobile hosts having an associated permanent IP address, each of said base stations also being operative to allocate a dynamic IP address for each of said mobile hosts located within the associated coverage area; so that the dynamic IP addresses are allocated from a dynamic IP address space, and wherein each of the base stations is associated with a portion of the dynamic IP address space, each of the base stations being operative to allocate the dynamic IP addresses from the associated portion of the dynamic IP address space; and wherein each of the base stations is further operative to receive first packets via the backbone, each of the first packets carrying a dynamic IP address of an associated destination one of the associated local mobile hosts, each of the base stations being operative to translate the dynamic IP addresses carried by said first packets to the permanent IP addresses of said associated destination mobile hosts in the manner and complexity explicitly recited in the claims of the invention. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and to avoid processing delays should preferably accompany the Issue Fee. Such submissions should be clearly labeled Comments on Statement of Reasons for Allowance.
